

Corporate Overview & Core Competencies

Strategy. Security. Innovation.

Executive Summary

Swif7Edge is a mission-driven, **Service-Disabled Veteran-Owned Small Business (SDVOSB)** and **SWaM Certified (Commonwealth of Virginia)** founded by U.S. Army veterans. We provide a technology-agnostic, proactive cybersecurity, predictive analytics and AI Integration approach to ensure mission success for federal agencies and private sector enterprises. Our leadership combines deep expertise from the Department of War (DoW), Intelligence Community (IC), and United States Special Operations Command (USSOCOM) to deliver innovative, defensible, and compliant solutions.

Our 7 Patriot Values

Partnership | Agility | Trust | Reliability | Integrity | Outcomes | Teamwork

Core Expertise

- **Proactive Cybersecurity:** We prioritize threat mitigation and attack prevention rather than reactive recovery. Our approach identifies, anticipates, and prevents cyberattacks before they can infiltrate your IT security systems, agnostic of the technology used.
- **AI Integration & Governance:** We deploy ethical, regulation-aligned AI to automate processes and enhance predictive threat modeling. Our services include intelligent automation, enhanced decision support, and predictive threat and trend modeling.
- **Predictive Analytics:** We transform complex data into actionable intelligence, reducing "Time-to-Mission" by 25%. We build predictive dashboards and intelligence layers that anticipate market and threat trends and optimize operational efficiency.
- **Offensive Security:** Specialized penetration testing aligned with NIST, CMMC, and FedRAMP standards. Our team includes former NSA TAO Master Operators and OSCP exam developers.
- **24/7 Security Operations Center (SOC):** Round-the-clock monitoring to identify and neutralize threats before infiltration. Few cybersecurity businesses take a proactive approach or maintain the infrastructure required for a SOC.

The Swif7Edge Advantage: Why We Are Different

While 70% of digital transformations fail by leading with technology, we lead with **strategy**. We begin with your strategic roadmap—not a preselected tool or vendor. This ensures every solution is aligned with your specific operational risks, business requirements, and measurable outcomes.

- **Agile-First Methodology:** Delivering 98% SLA compliance and optimized cost structures.
- **Mission-Proven Leadership:** Our team includes former NSA TAO Master Operators and OSCP exam developers with experience in high-stakes, legally sensitive environments.
- **Compliance Excellence:** Expert guidance through RMF, NIST, and ATO (Authorization to Operate) processes.
- **Dual-Sector Expertise:** Deep experience across DoW, IC, SOCOM, and the private sector, including financial services, healthcare, energy, and law firms.

Governance & Oversight

We provide independent oversight to reduce the risk of the unknown, addressing challenges including:

- Civil rights liability and PII/data protection risks
- Regulatory exposure and compliance gaps
- Vendor bias and hidden dependencies
- Objective evaluations of AI and cybersecurity solutions

Tactical Service Offerings

- **Risk Assessments:** Comprehensive compliance and vendor risk evaluations.
- **Zero Trust Architecture:** Implementing "Never Trust, Always Verify" frameworks.
- **Infrastructure Establishment:** Tailored IT framework development and incorporation.
- **Governance & Oversight:** Reducing regulatory exposure and mitigating vendor bias.
- **AI Integration Services:** Ethical, regulation-aligned AI to automate processes and enhance decision support.
- **Penetration Testing:** Offensive security testing aligned to NIST, CMMC, and FedRAMP standards.

Industry-Leading OSCP Preparation

The OSCP is the industry's premier hands-on certification, yet the global pass rate is only 30%. Swif7Edge bridges this gap with personalized mentorship from elite offensive cyber practitioners, including a former NSA TAO Master Operator and a former OSCP Exam Developer.

Training Tiers of Excellence:

Tier	Profile	Value Proposition
Tier 1: Proving Ground (\$949)	Self-starters & Hobbyists	4-month Cyber Range access and 24/7 customer support
Tier 2: Live Fire Operator (\$5,549)	Career Switchers & Junior Pros	Live demos, instructor support, and weekly coaching
Tier 3: Advanced Tradecraft (\$7,549)	Executives & Enterprise Teams	1:1 Mentorship with OSCP Pass Guarantee. OffSec PEN-200 included.

Who We Serve

- **Federal:** Department of War (DoW), Intelligence Community (IC), and Federal Agencies.
- **Commercial:** Financial Services, Healthcare, Energy, Law Firms, and E-Commerce.
- **Data Owners:** Any organization where data is a high-value target.
