

SWIF7EDGE

STRATEGY. SECURITY. INNOVATION. · A TECHNOLOGY-AGNOSTIC APPROACH TO MISSION SUCCESS

CAPABILITY STATEMENT

GOVCON TEAMING PARTNERS

Core Focus: Proactive Cybersecurity & Predictive Analytics

S7E@Swif7Edge.com · www.Swif7Edge.com · (304) 913-7873

Swif7Edge, LLC is a **Service-Disabled Veteran-Owned Small Business** founded and led by U.S. Army veterans from the Intelligence Community, USSOCOM, and the Department of War. We pair elite cyber operators with disciplined program management to deliver proactive cybersecurity, predictive analytics, and AI integration, as a **prime** and as a reliable **subcontractor** that integrates cleanly into high-tempo teams.

WHY TEAM WITH SWIF7EDGE

- ◆ **Small-business goal credit & set-aside access:** a certified SDVOSB / VOSB / SDB helps your team hit small-business subcontracting goals and pursue SDVOSB set-aside vehicles.
- ◆ **Strategy-first, technology-agnostic:** we start with the mission and requirement, never a preselected vendor or tool.
- ◆ **Cleared, battle-tested team:** staff hold TS/SCI clearances with CI polygraph, with deep operational heritage across DIA, FBI, USMC, ARCYBER, USSOCOM, ODNI & NSA.
- ◆ **Specialized cyber & IC mission depth:** bring us on to cover the offensive-cyber, red-team, and intelligence-community mission scope that's hardest to staff. Our senior operators bring nation-state-fidelity tradecraft and firsthand fluency with IC and special-operations customers (DIA, USSOCOM, ODNI, NSA, ARCYBER), strengthening your technical approach and past-performance.

★ CORE STRENGTH · RAPID CAPABILITY DEVELOPMENT

We maintain **internal rapid-development lifecycles** (agile / DevSecOps pipelines with Infrastructure-as-Code and automated Kubernetes orchestration) that let us stand up a new capability or service line to meet a partner's or customer's emerging requirement in **weeks, not quarters**. New capabilities move through disciplined 30 / 60 / 90-day build phases with senior review gates: bring us an unmet need and get a delivered, governed capability fast.

WHAT WE PROVIDE

OFFENSE-INFORMED DEFENSE

Proactive Cybersecurity

- Full-spectrum penetration testing & red / purple team engagements
- Vulnerability research and exploit / tool development
- SOC operations & security engineering
- RMF / NIST / Zero Trust & full ATO lifecycle (SSP, SAR, POA&M)
- CMMC readiness (L1–3) & C3PAO assessment prep *with a certified C3PAO partner*

FROM DATA TO DECISIONS

Predictive Analytics

- Predictive risk modeling: supply-chain, financial & anomaly detection
- Decision dashboards & business intelligence
- Strategic planning & PPBE support
- Turning raw data into a governed strategic asset

GOVERNED AUTONOMY

AI Integration Services

AI agents are **privileged actors**: write access like a service account, discretion like an engineer. We bring them under managed control with scoped identity, least privilege, change gates, separation of duties, configuration baseline, audit trail, and codified procedure.

- Agent deployment under enforced guardrails: scoped identity, path confinement, human-held approval gates
- Codified procedure: customer workflows captured as versioned, reviewable skills that outlive the engagement
- Regulation-aligned, explainable AI governance with human oversight, mapped to AC / CM / AU control families
- Intelligent automation: SOC triage agents, document classification
- ML engineering & agent pipelines

FORCE MULTIPLIER

OSCP Training

- OSCP-aligned curriculum led by OSCP-certified operators
- Tiered cohort program: range labs, live-fire coaching, 1:1 mentorship
- Workforce development aligned to DoD 8140 roles
- We grow operators, taught to the standard the threat demands

PROOF

- **Representative clients (leadership heritage):** enterprise cyber, capability programming, and inspection programs across USSOCOM, ARCYBER (260+ cyber units), DIA (high-security wireless across 140+ locations), the FBI (built & led red / blue teams), ODNI & NSA; local government for Luzerne County, PA (first county-wide Responsible AI policy), plus commercial delivery for Amazon, American Express, KPMG & Shutterfly.
- **Inspection-program growth:** under our leadership a DIA JWICS cybersecurity inspection program expanded from 12 to over 30 personnel in two years, and the customer tripled its size, scope & profitability.
- **New-prime posture (FAR 15.305):** a *Neutral* corporate past-performance rating backed by *High Confidence* from our principals' individual records and our teaming partners.
